Continued from previous page...

Plas-Tight 45° Screws are a Metric 3-Lobe Bodied Screw that encompass a 45° thread profile which allows deep thread penetration into the plastic material. The 3-lobe body allows displaced material to cold flow back into relief areas which minimises radial stress and reduces the possibility of failure.

Material: Steel, Stainless Steel A2 (Selected Sizes Only)

Finish: Zinc Plated, Self Colour

For the part number replace ** with the required length found in the tables below:
